# The ADDIE Process

A visual overview of the five phases and their key steps

## A — 1. Analysis

Identify the problem and decide whether training is the right solution.

**KEY STEPS**

1. Needs Analysis
2. Learner Analysis
3. Task Analysis
4. Context Analysis

## D — 2. Design

Plan how the instructional solution will achieve the learning outcomes.

**KEY STEPS**

1. Set Learning Objectives
2. Select Instructional Strategies and Theories
3. Plan and Sequence the Content
4. Choose Teaching Methods
5. Design Learning Activities
6. Plan Assessments
7. Select Media and Tools
8. Plan Feedback and Learner Support

## D — 3. Development

Build the instructional materials based on the design plan.

**KEY STEPS**

1. Develop Instructional Material
2. Develop Facilitator Guide
3. Develop Slide Deck

## I — 4. Implementation

Deliver the learning experience to the intended audience.

**KEY STEPS**

1. Prepare the Learning Environment
2. Deliver the Instruction
3. Support Learners and Instructors

## E — 5. Evaluation

Determine whether the instruction worked and how it can be improved.

**KEY STEPS**

1. Formative Evaluation
2. Summative Evaluation
3. Check Learning Objectives
4. Review Results
5. Collect Feedback
6. Improve the Training
